

GROWER'S CHOICE

It's the **RIGHT** Choice

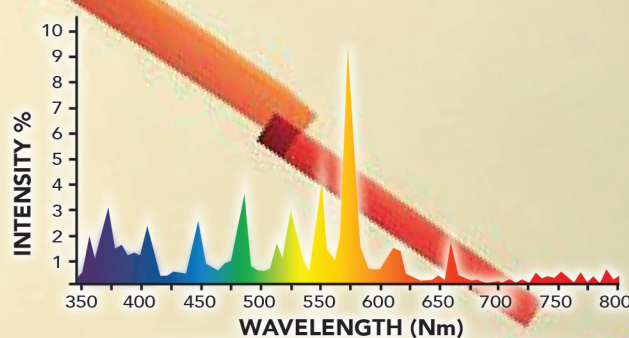

2K: 1000W Double Ended HPS

- Optimal choice for flowering plants
- Warm color matches spectral output of fall light
- Highest Par value in the industry @ 2100 umol/s
- 5% degradation rate @ 10,000 hours

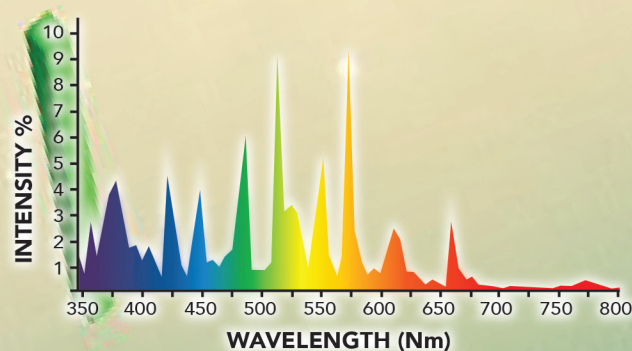

4K: 1000W Double Ended MH

- Can be used in both flowering and vegetative growth
- Promotes vegetative growth by mimicking summer light
- Includes UV and IR spectra for enhanced resin production
- Promotes short, bushy growth in flowering plants

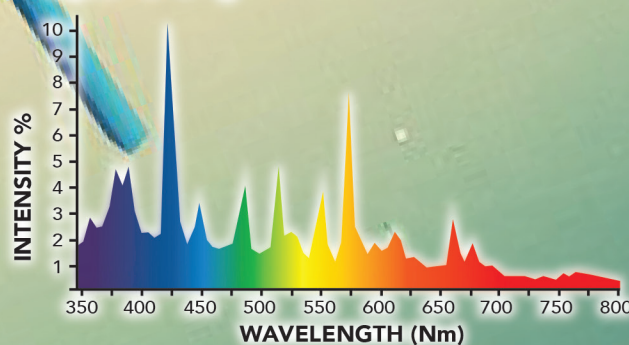

6K: 1000W Double Ended MH

- Optimal choice for vegetative growth
- Tighter inter-nodal spacing
- Includes UV spectra for resin production
- Promotes bushy growth in plants

10K: 1000W Double Ended MH

- Highest level of UV output in it's class
- Ultraviolet light increases resin production in plants
- 10K bulb provides both infrared AND ultraviolet light
- Designed to increase resin production on the last 7-14 days of flowering

- Optimized spectrum, distribution pattern, lumen output and irradiance
- Upgrade your existing fixture by simply switching the bulb
- Grower's choice incorporates UV and IR spectra to match sunlight better than the competition
- Our line provides a full spectrum solution for ALL stages of growth
- 1 year warranty

Also available in 600W unit
